

RationAssist Wagyu

High-production feed solutions,
specially designed for Wagyu cattle

GrainCorp

Why RationAssist Wagyu works

Molafos Wagyu Liquid Concentrate has been designed to meet the specific nutritional requirements of Wagyu cattle, enhancing marbling performance and maintaining structural integrity.

The unique RationAssist program enables producers to utilise on-farm commodities and infrastructure by using a customised molasses liquid concentrate, delivering a balanced ration to Wagyu cattle.

Feed decisions made easy

7 STEPS

to higher production

Working with you to ensure the program meets your objectives and remains on budget

Call GrainCorp Feeds on 1800 333 010 to discuss your objectives and options with our Customer Support Team.

Send us a sample of your on-farm commodities and we'll run a free nutritional analysis.

Simple system, multiple benefits

- ▶ Ongoing support from our nutritionists.
- ▶ Easy-to-follow, fully balanced rations for intensive finishing/feedlotting and paddock supplementations
- ▶ Accurate means of costing your feed ration (\$/tonne).
- ▶ Calculating and forecasting the cost of the feeding program (\$/head/day).
- ▶ Achieving production targets cost effectively.

Your guideline for putting your ration together on farm.

Our formulations team draws up a complete ration.

You receive a free nutritional analysis of your ration, with the correct mix of protein, energy, minerals and vitamins to achieve your targets.

You also receive a batch card, which is your guideline for putting your ration together on farm.

Molafos Feedlot Concentrate comes in IBCs (via your local agent) or in bulk.

Produce world-class Wagyu beef

Here's everything you'll need...

Mixer wagon

A mixer wagon and tractor to fully combine the ingredients in your ration.

Tank and pump

A tank or IBCs to store your feedlot concentrate. The pump will deliver the concentrate into your wagon quickly and efficiently.

Feed-out facilities

The ration is dispensed from the mixer wagon into either an open trough/bunk, or into self-feeders.

Do you have these commodities on farm?

Typically, these ingredients are required to formulate a world-class ration with RationAssist:

- ▶ **Cereal grains:** Wheat, sorghum, barley.
- ▶ **Protein:** Meals, lupins, faba beans, whole cotton seed.
- ▶ **Roughage:** Straw, hay, silage or pasture.

Powered by science Guided by experience

Uniquely formulated for Wagyu cattle, our molasses-based liquid concentrate offers:

- ▶ Increased palatability
- ▶ Dust and fines elimination
- ▶ Even distribution
- ▶ Ease of handling
- ▶ Elimination of ration sifting
- ▶ Monensin and Flavophospholipol

Invest in high performance. We'll show you how.
